

Abstract of the Disclosure

A toothbrush and handle therefor are provided. The handle has distal and proximal ends, the distal end being connected to a brush head. The handle has a first grip portion with an ovoid cross-section having a major axis and a minor axis. The handle also has a second grip portion with an elliptical cross-section having a major axis and a minor axis. The major axis of the second grip portion is perpendicular to the major axis of the first grip portion.
